

KEY MESSAGES

- Donate to the Worldwide Trek to support Cystic Fibrosis Canada's work to ensure all Canadians living with cystic fibrosis have access to the medicines they need to live longer and healthier lives.
- By donating to the Worldwide Trek, you are helping researchers find new answers for our community. Register now and help fund new treatments that will go **#FurtherForAll!**
- Further For All means more CF research for more breakthroughs. It means more advocacy so that people who need treatment now can get access NOW. Further For All means stronger supports for people living with CF and their families. Help us go **#FurtherForAll** by donating to the Worldwide Trek!
- The median age of survival for a Canadian living with cystic fibrosis increased to 57.3 years in 2021, thanks to supporters like you who raise money for CF research and new treatments.
- There is much more work to be done because these new treatments are not a cure, they will not help everyone, they aren't affordable for some and for many people diagnosed with CF, they have come too late. We want to ensure no one is left behind and everyone in our community can thrive.
- How is your donation going further for CF? You're helping to:
 - Fund critical cystic fibrosis research
 - Fund healthcare initiatives that ensure every Canadian with CF, including people on Trikafta, continues to receive the best possible care to manage their disease
 - Help continue the fight to ensure access to life-changing medicines
